

HR Data Analysis

Problem Statement

- Use Power BI to analyze and visualize data from organizations HR Dataset.
- Create Dashboards to visualize Employee information, department data and Employee feedback.

Data Model: 5 Tables, 33 Columns, 1480 Rows.

About Dataset

- HR dataset consists of data collected from all employees that are working for or have worked previously for the organization.
- The data included in this dataset is employee information such as their age, education, department, salary, feedback about the job etc.
- Some data variables such as education level, performance, feedback, amount of years spent at company are useful to HR managers to understand how their organization is growing
